Objectives of Ariba SLP & operational process

Introduction to Ariba SLP

Purpose of the Ariba SLP System

The purpose of the SAP Ariba SLP (Supplier Lifecycle and Performance) system for suppliers is to provide an end-to-end supplier management solution, with the goal of enabling organizations and suppliers to collaborate efficiently, transparently, and securely.

✓ 1. Supplier Registration Process

Captures essential supplier information in a structured way, such as company details, legal documents, and tax identification numbers.

Online forms help reduce errors and ensure data consistency.

✓ 2. Supplier Qualification & Approval

Buyers can use questionnaires and evaluation criteria to assess the readiness and suitability of suppliers before approval.

✓ 3. Supplier Performance Monitoring

Suppliers are monitored and evaluated periodically based on key metrics such as quality, delivery performance, and collaboration.

✓ 4. Supplier Master Data Management

Supplier information is centrally stored and integrated with other systems like SAP ERP.

This helps eliminate data duplication and improves data accuracy and consistency.

✓ 5. Increased Business Opportunities

Suppliers who are qualified and approved have greater chances of being selected in procurement processes.

Introduction to Ariba SLP

Benefits of Using SAP Ariba SLP for Suppliers

1. Efficient Supplier Data Management

Suppliers can update company information, licenses, and supporting documents by themselves through an online system, reducing the need for physical document submission.

2. Automated Notifications

The system sends alerts when documents are nearing expiration or when additional information is requested, helping minimize the risk of missing or incomplete data.

3. Real-Time Status Tracking

Suppliers can instantly check the status of their registration, certification, and other processes via the system.

4. Support for End-to-End Digital Procurement

Seamlessly integrates with the organization's e-Procurement system for tasks such as submitting quotations, invoices, and more.

5. High Data Security

Utilizes a cloud system that complies with international standards, reducing risks associated with traditional document or data storage.

6. Global System Usable Across Multiple Organizations

Once registered with SAP Ariba, the same account can be used with other companies that also use Ariba.
